EXPERIENCE

Anh Pham is an Australian-based research fellow at the Housing and Healthy Cities Research Group, School of Architecture and Built Environment, the University of Adelaide. Prior to joining the Healthy Cities Group, Anh was a visiting lecturer at the School of Economics within the same university. Anh completed her PhD in Economics and was awarded Dean's Commendation for Doctoral Thesis Excellence in July 2016.

Anh has been developing research interests in the areas of housing, international trade and development, panel data applications and health economics. Anh's current research activities are in understanding how social and economic public policy can be enhanced by evidence generated from the application of novel analytical strategies to diverse data. She has expertise in econometric modelling using nationally representative household-based longitudinal surveys (e.g. HILDA, IFLS) and large-scale administrative datasets (e.g. PIA).
